1. Grey line underneath header being there all the time – not just once you’ve scrolled down
2. ‘About Us’ looks a tiny bit smaller than other headings?? (can you just check for me)
3. Fourfold logo just needs updating – it looks the same as the one I’ll send you but the icon should touch the ‘f’
4. Can you change “WE ARE FOURFOLD” to “WE’RE FOURFOLD” please

5. Position of all these things – seems aligned to the right to me. Need to balance it up more. Everything moved slightly left. Social handles closer to other headings.

WELCOME TO ANALOGFOLK

A global creative agency that makes and markets interactive experiences. We use digital to make the analog world better.

OUR APPROACH

Featured work

6. Can we add an extra icon on the right hand side of social icons?
Instead of 'newsletter' on the right, could we have 'Free 45 min Q&A'

Icon (same style as others) could just be people talking to each other or something similar

Get all the latest folk stories, news and views

7. Need to get the scrolling much much smoother than it is at the moment (as already discussed).
See Analog Folk the timing of each of the transitions and the way it 'pops' before the different things happen

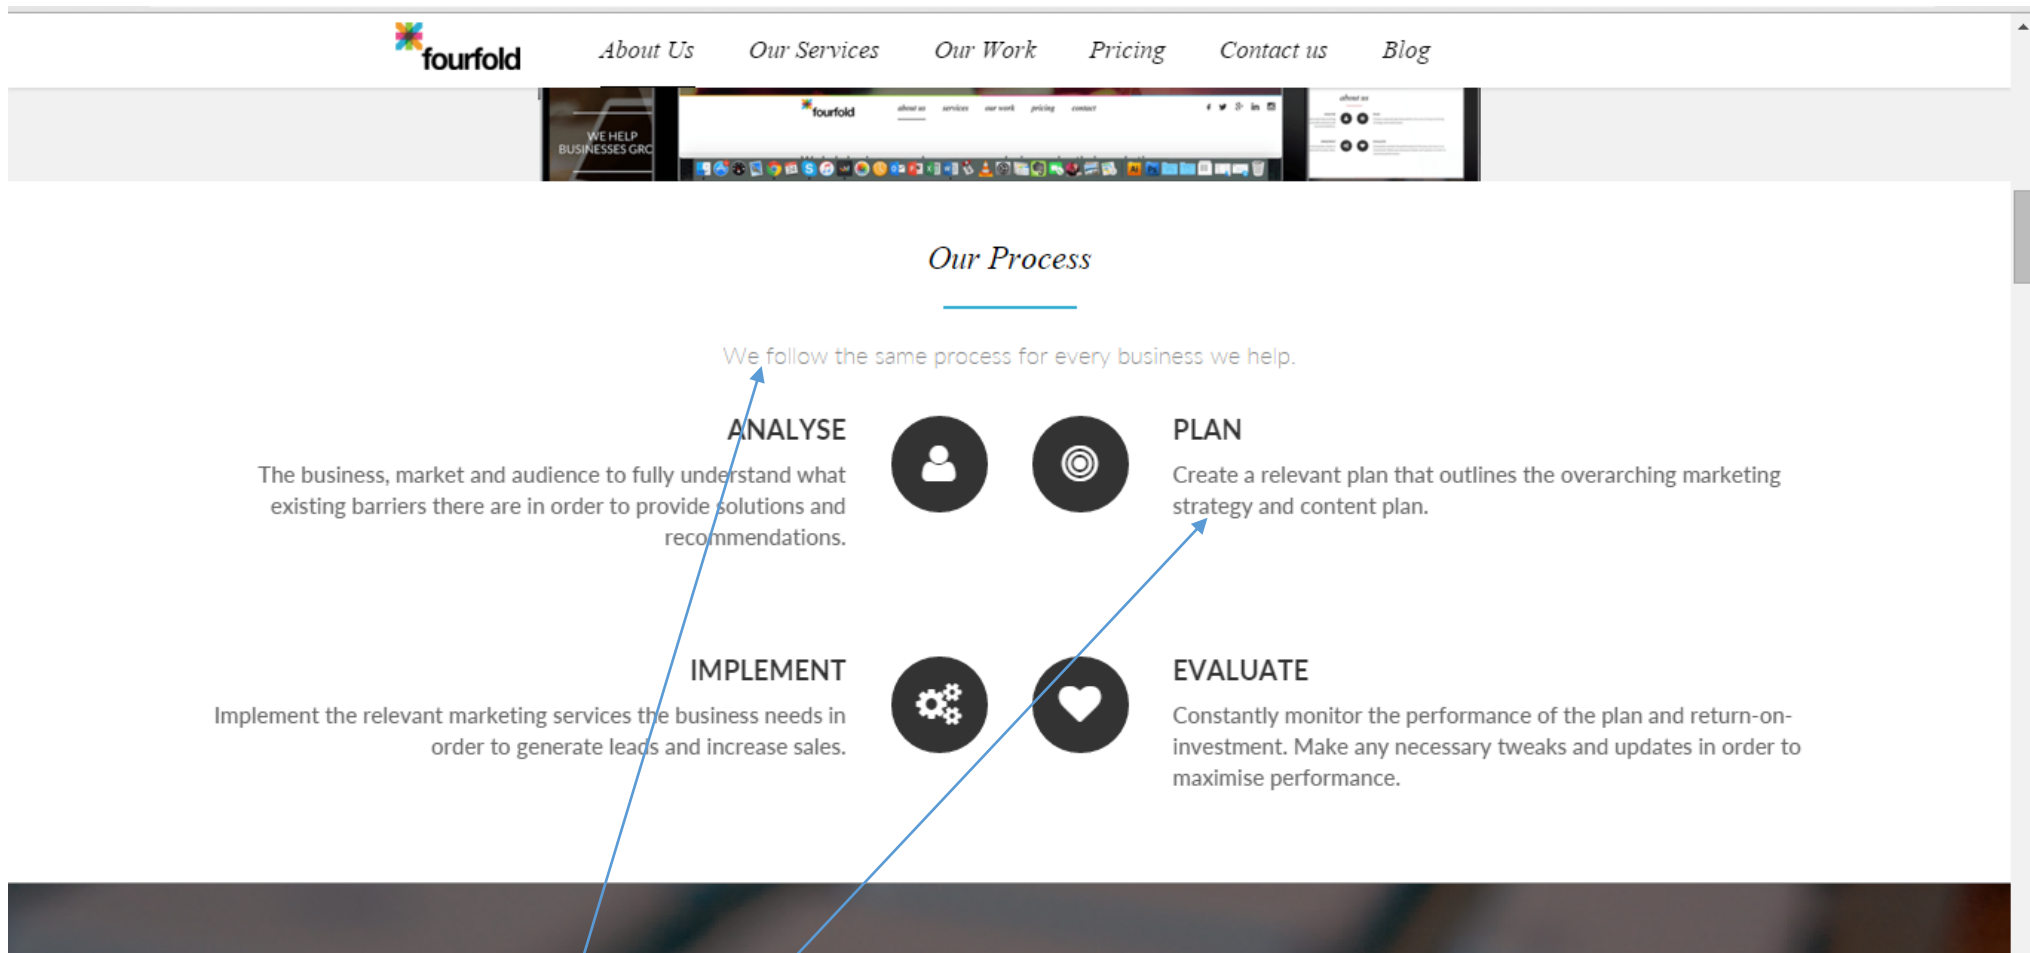

See links at top of page for JQuery scrolling code options (not sure if that helps)...

8. Would like to get this transition slightly better. Not sure if the 'pop-up' needs to be slowed down slightly but on the Visia theme you can see it coming from underneath the page and on our one it happens and it's easy to not notice it if that makes sense? Size of it though is great

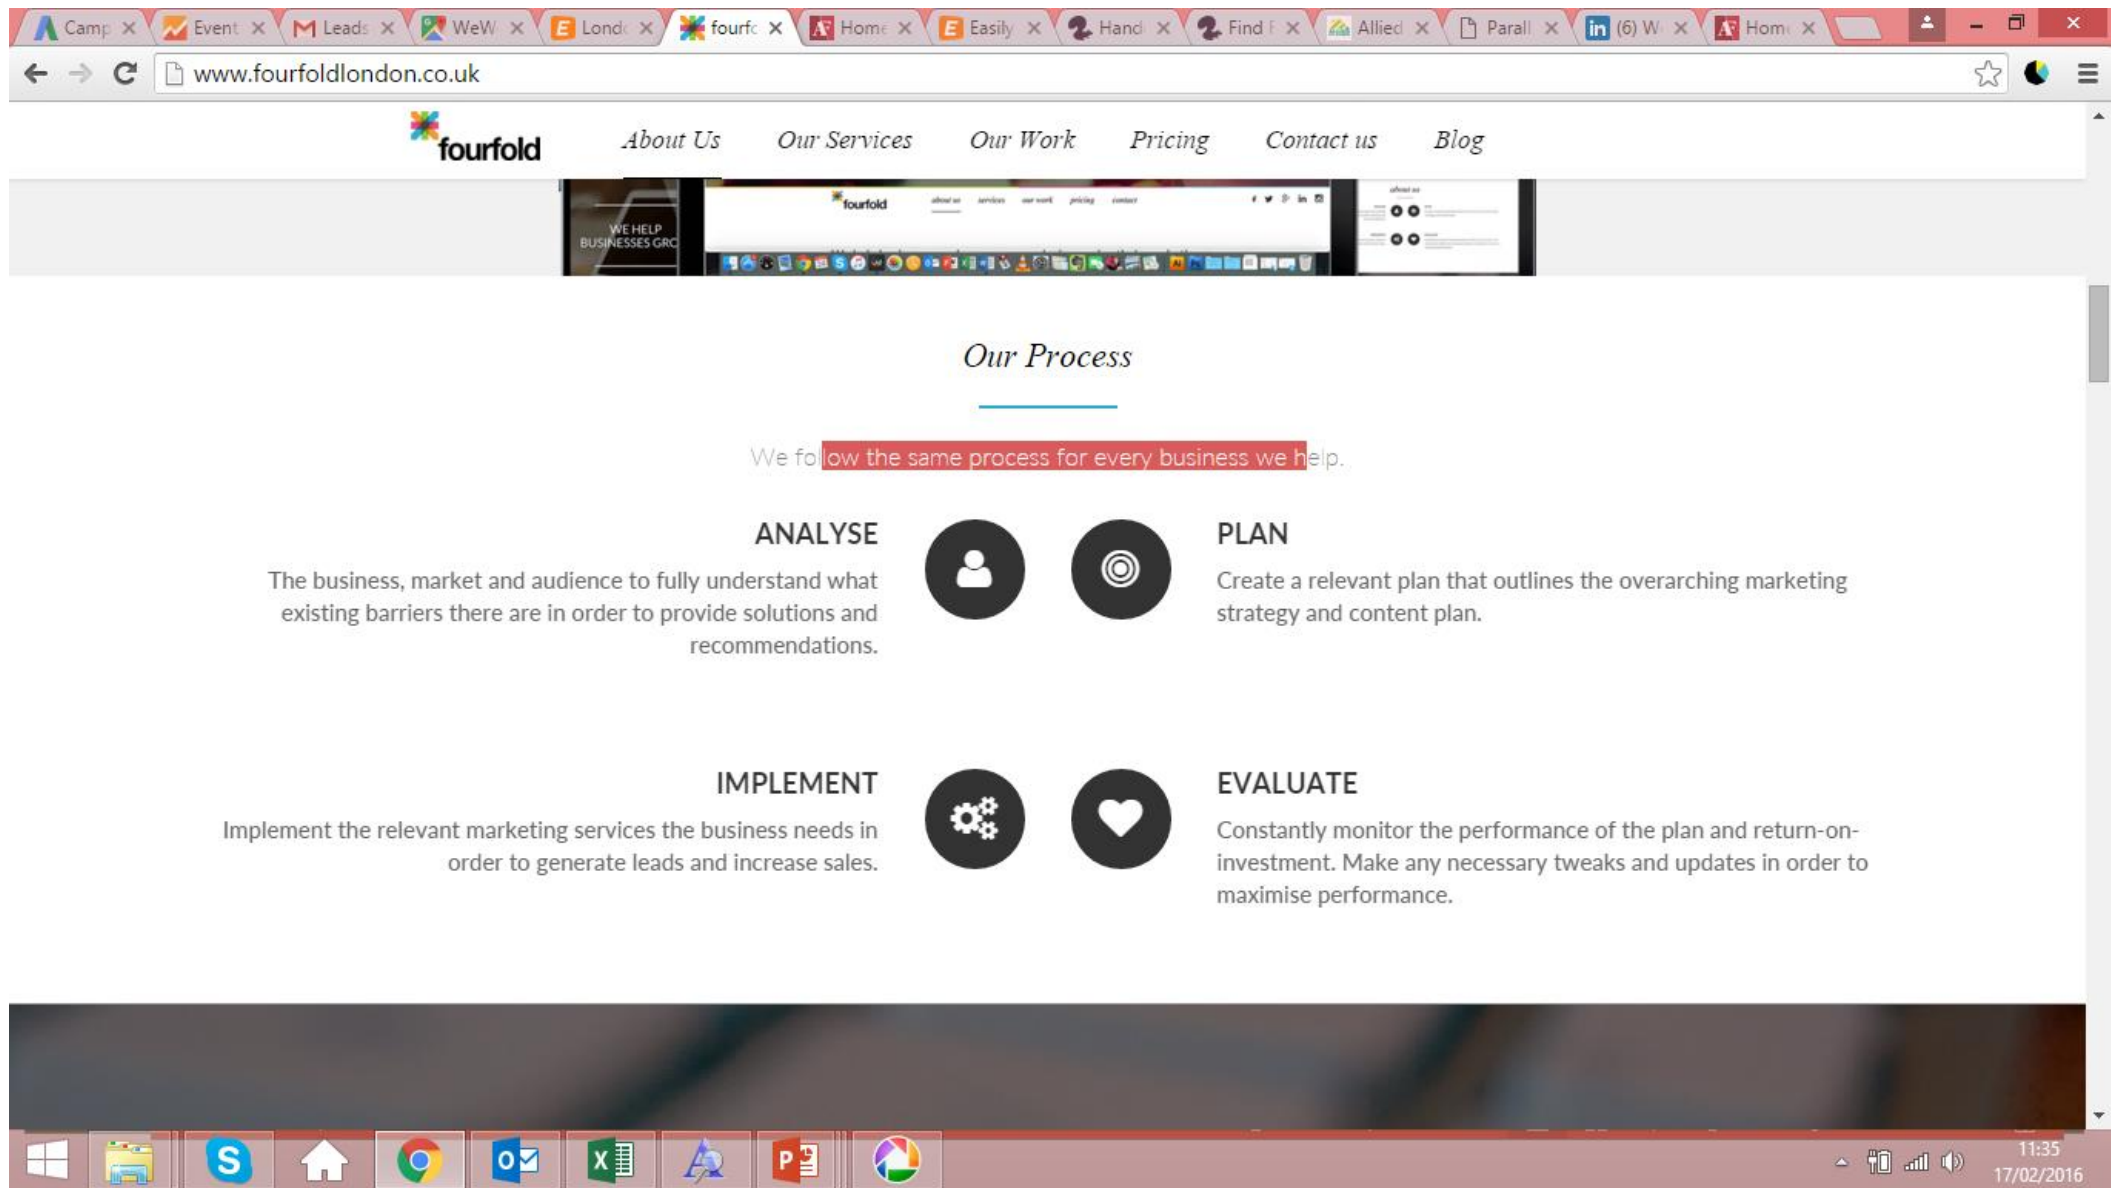

9. Still questioning this font.. Not sure if it's because of the laptop I'm on but it's difficult to read everything so is quite important. Look at the next slide how the fonts look different in the same section...

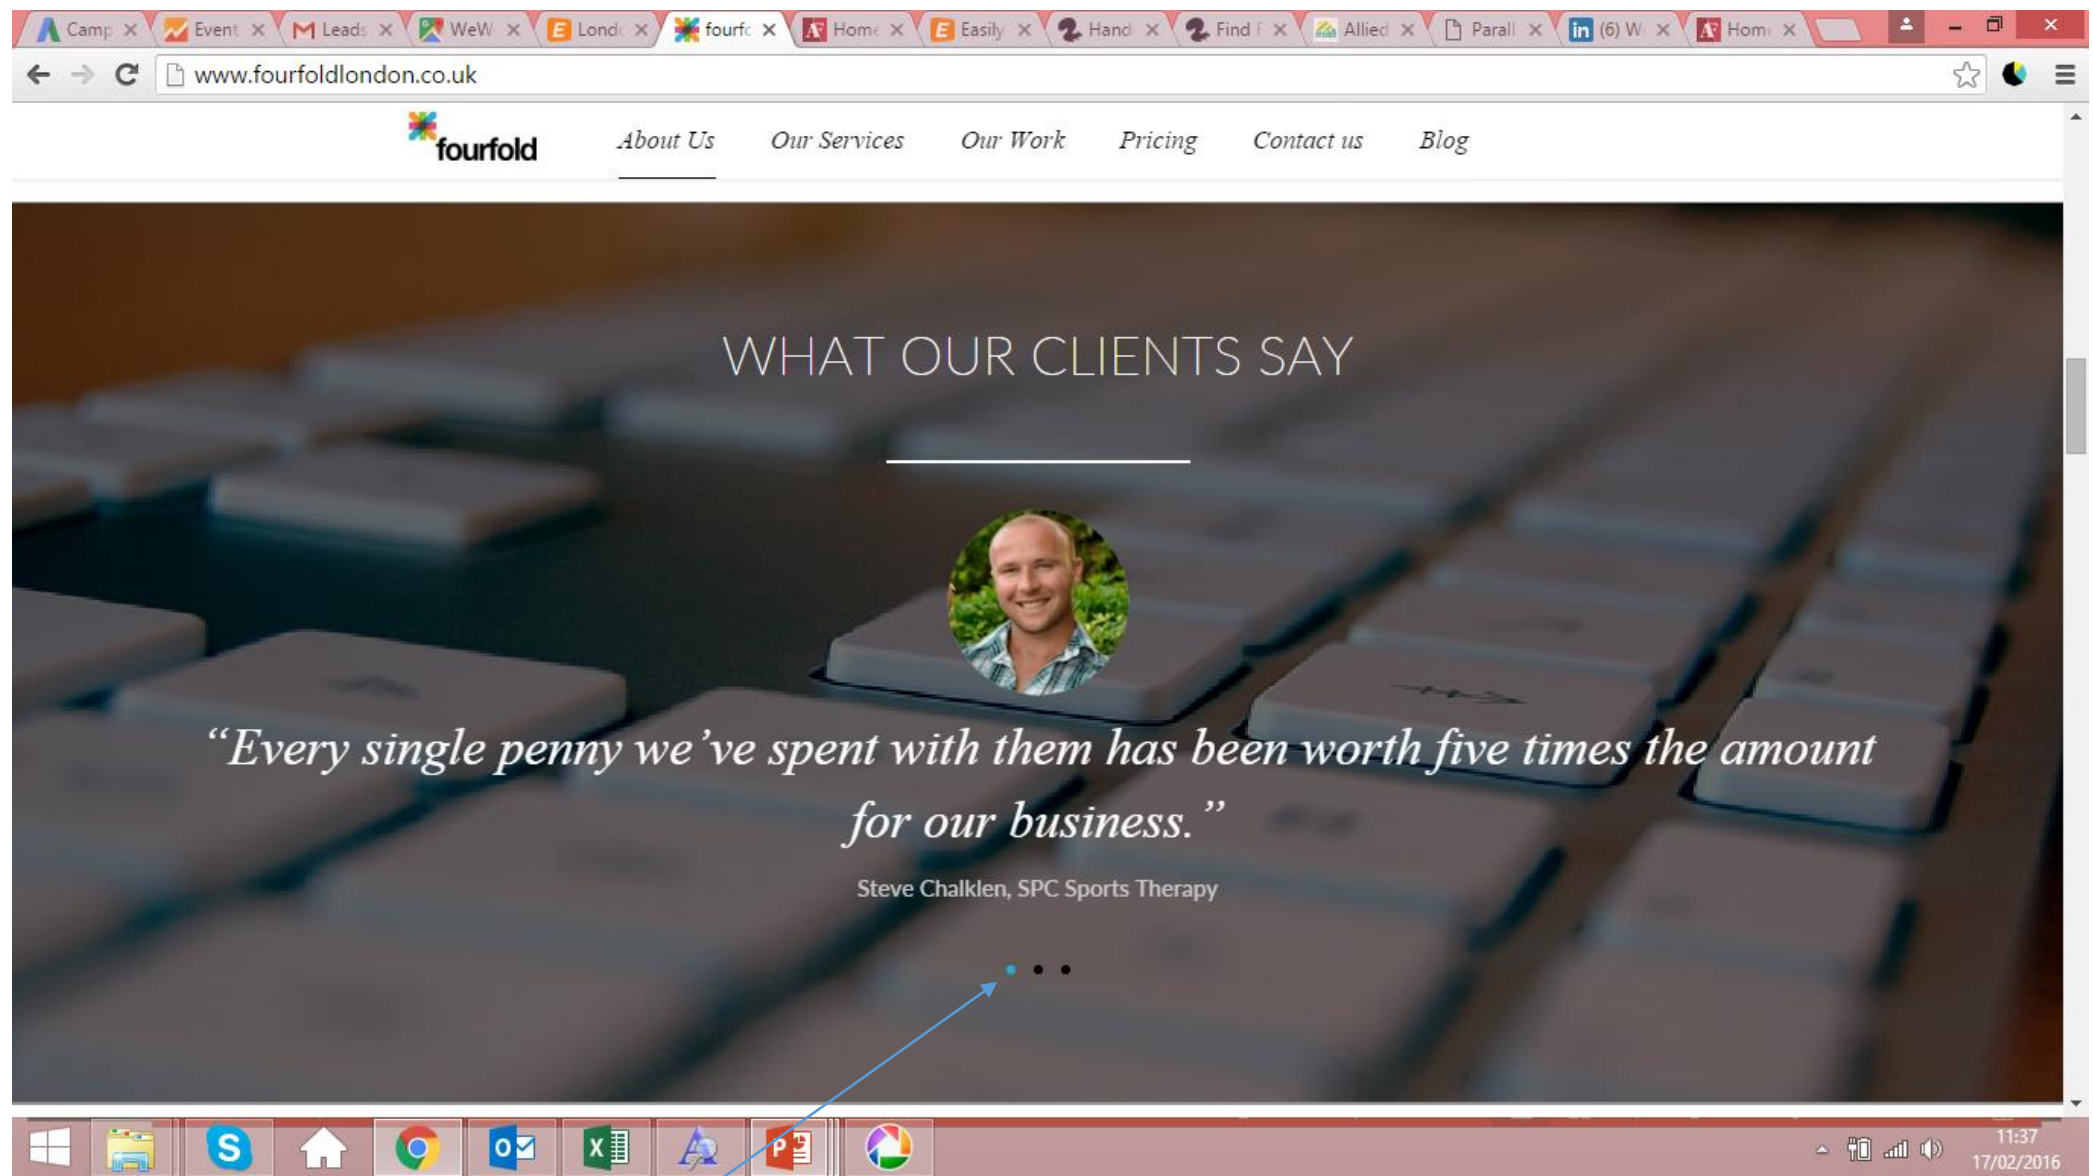

Difference between how the fonts look...

One is nice and easy to read. First line is difficult to read (ideally all the body copy would be like the font that's easier to read I think)

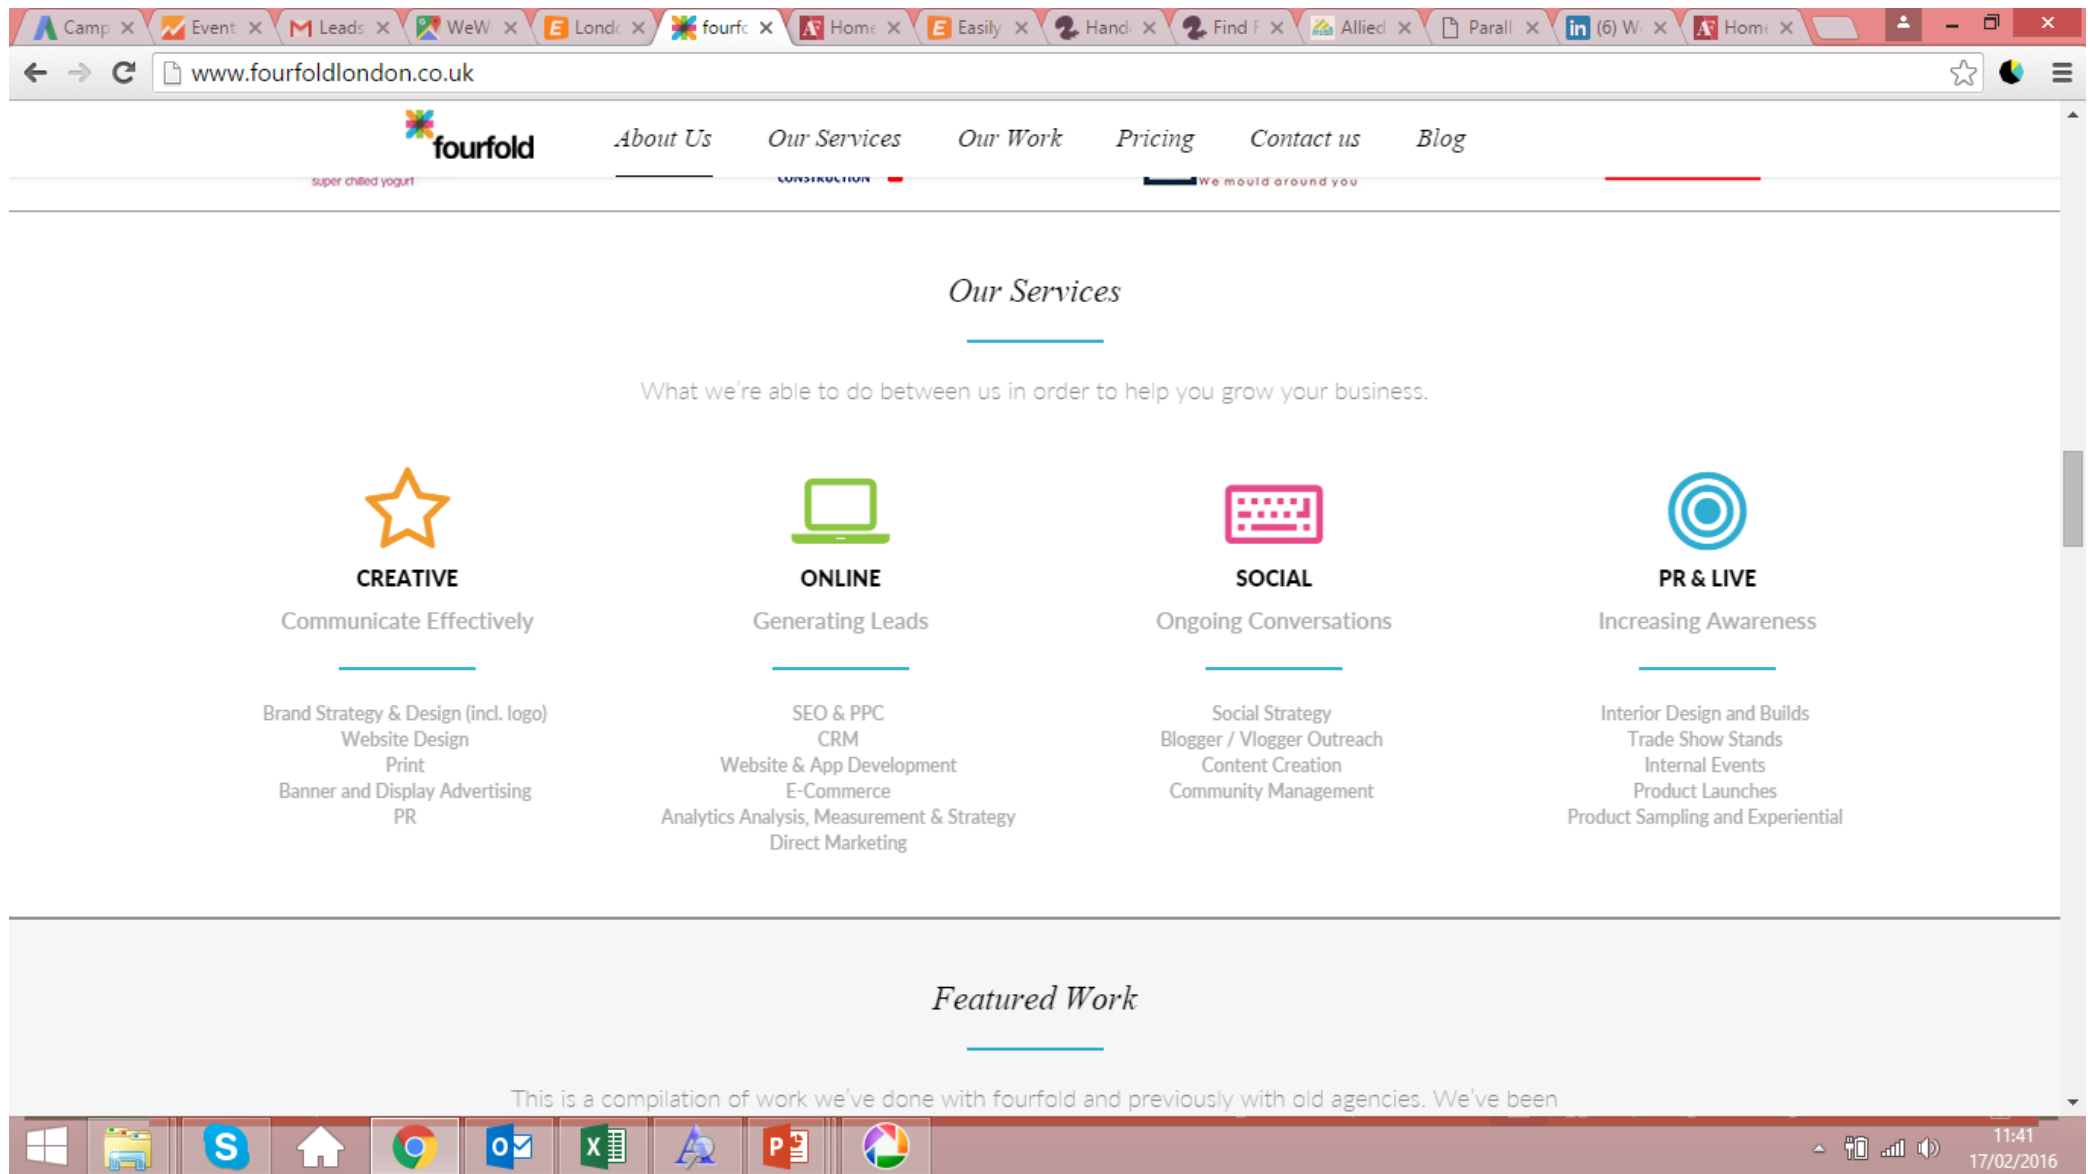

10. Not a big deal but when you highlight text it comes up in original theme red colour.. Would be good if this was our blue

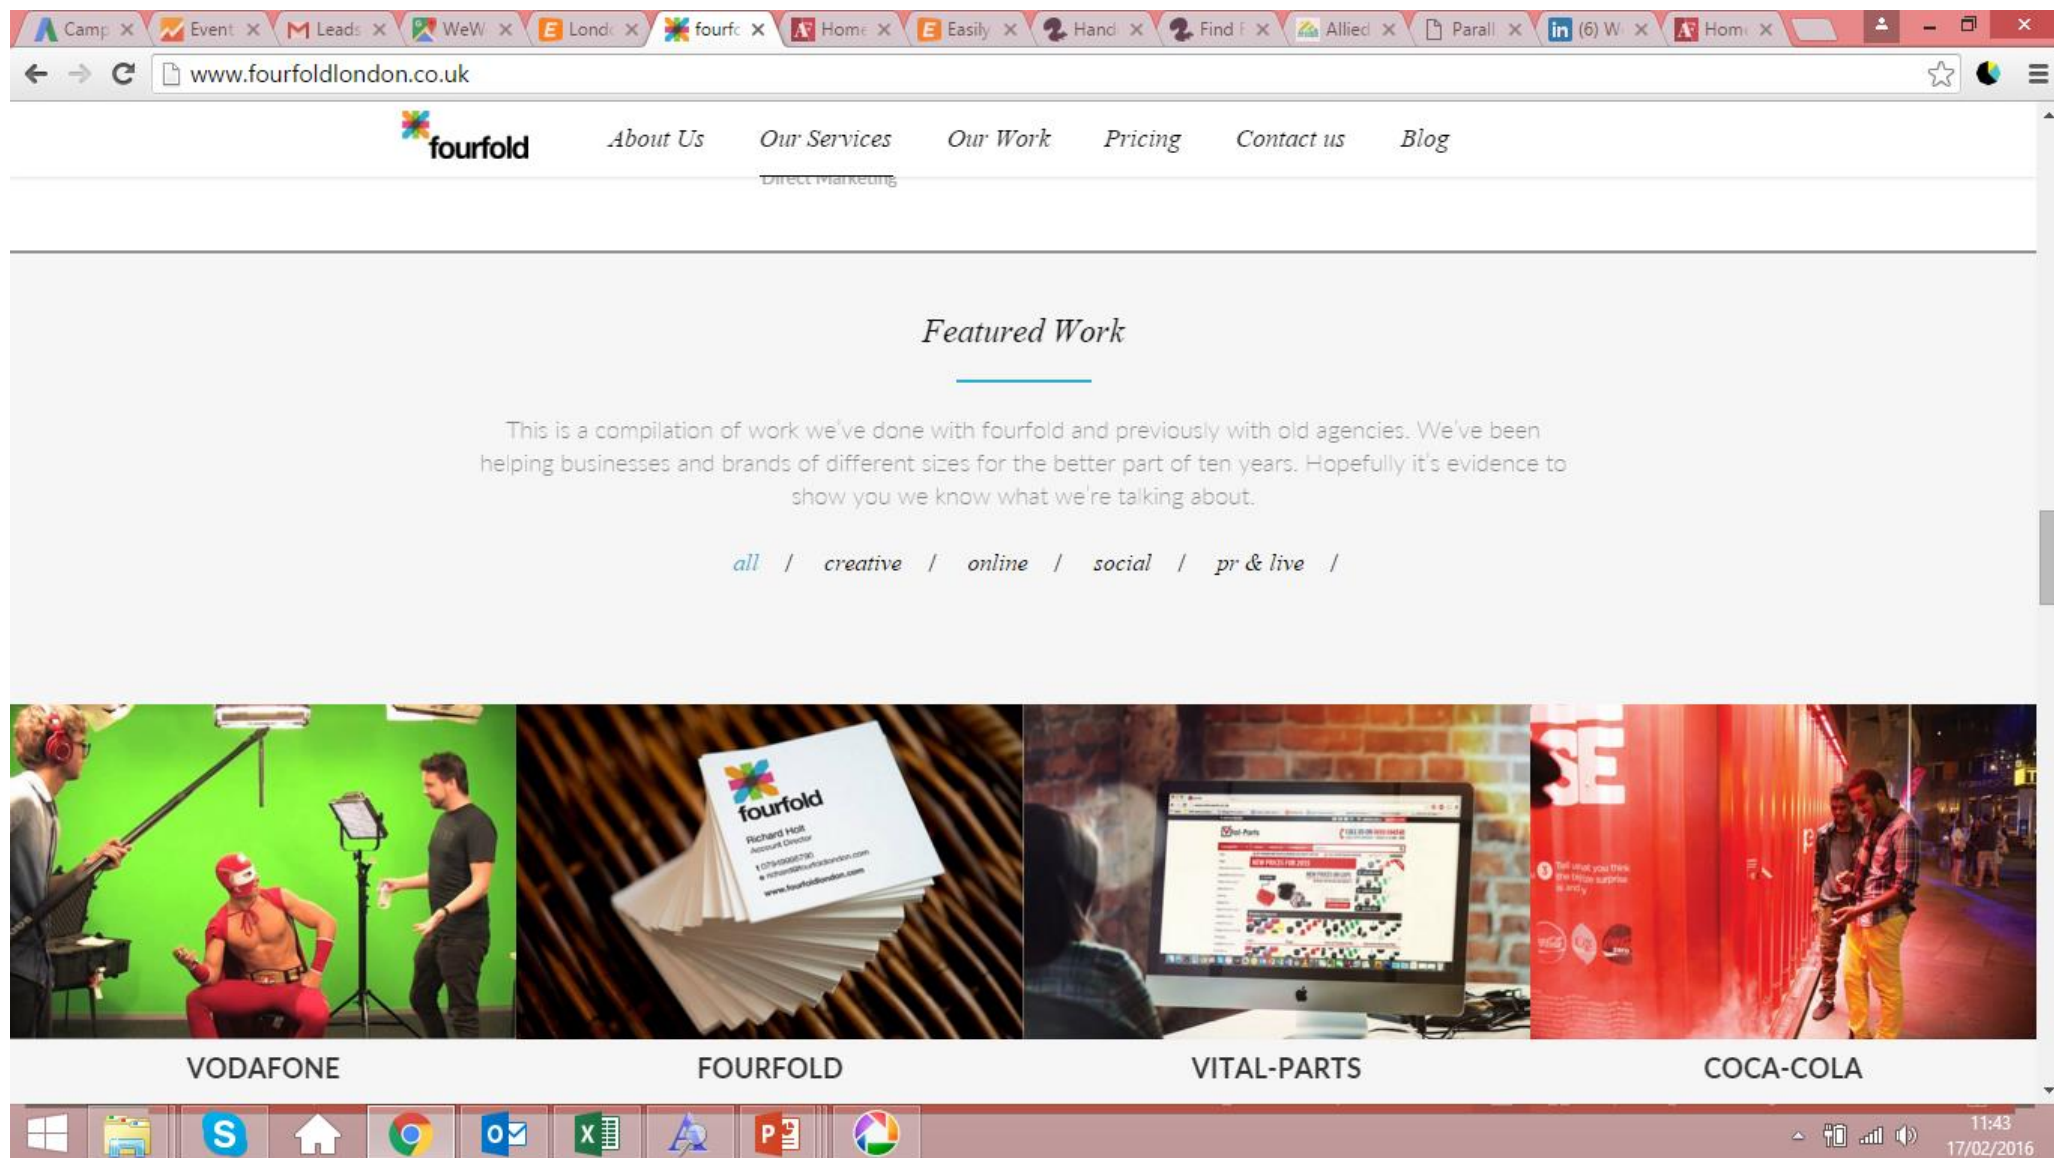

11. Can you change these dots to white for me

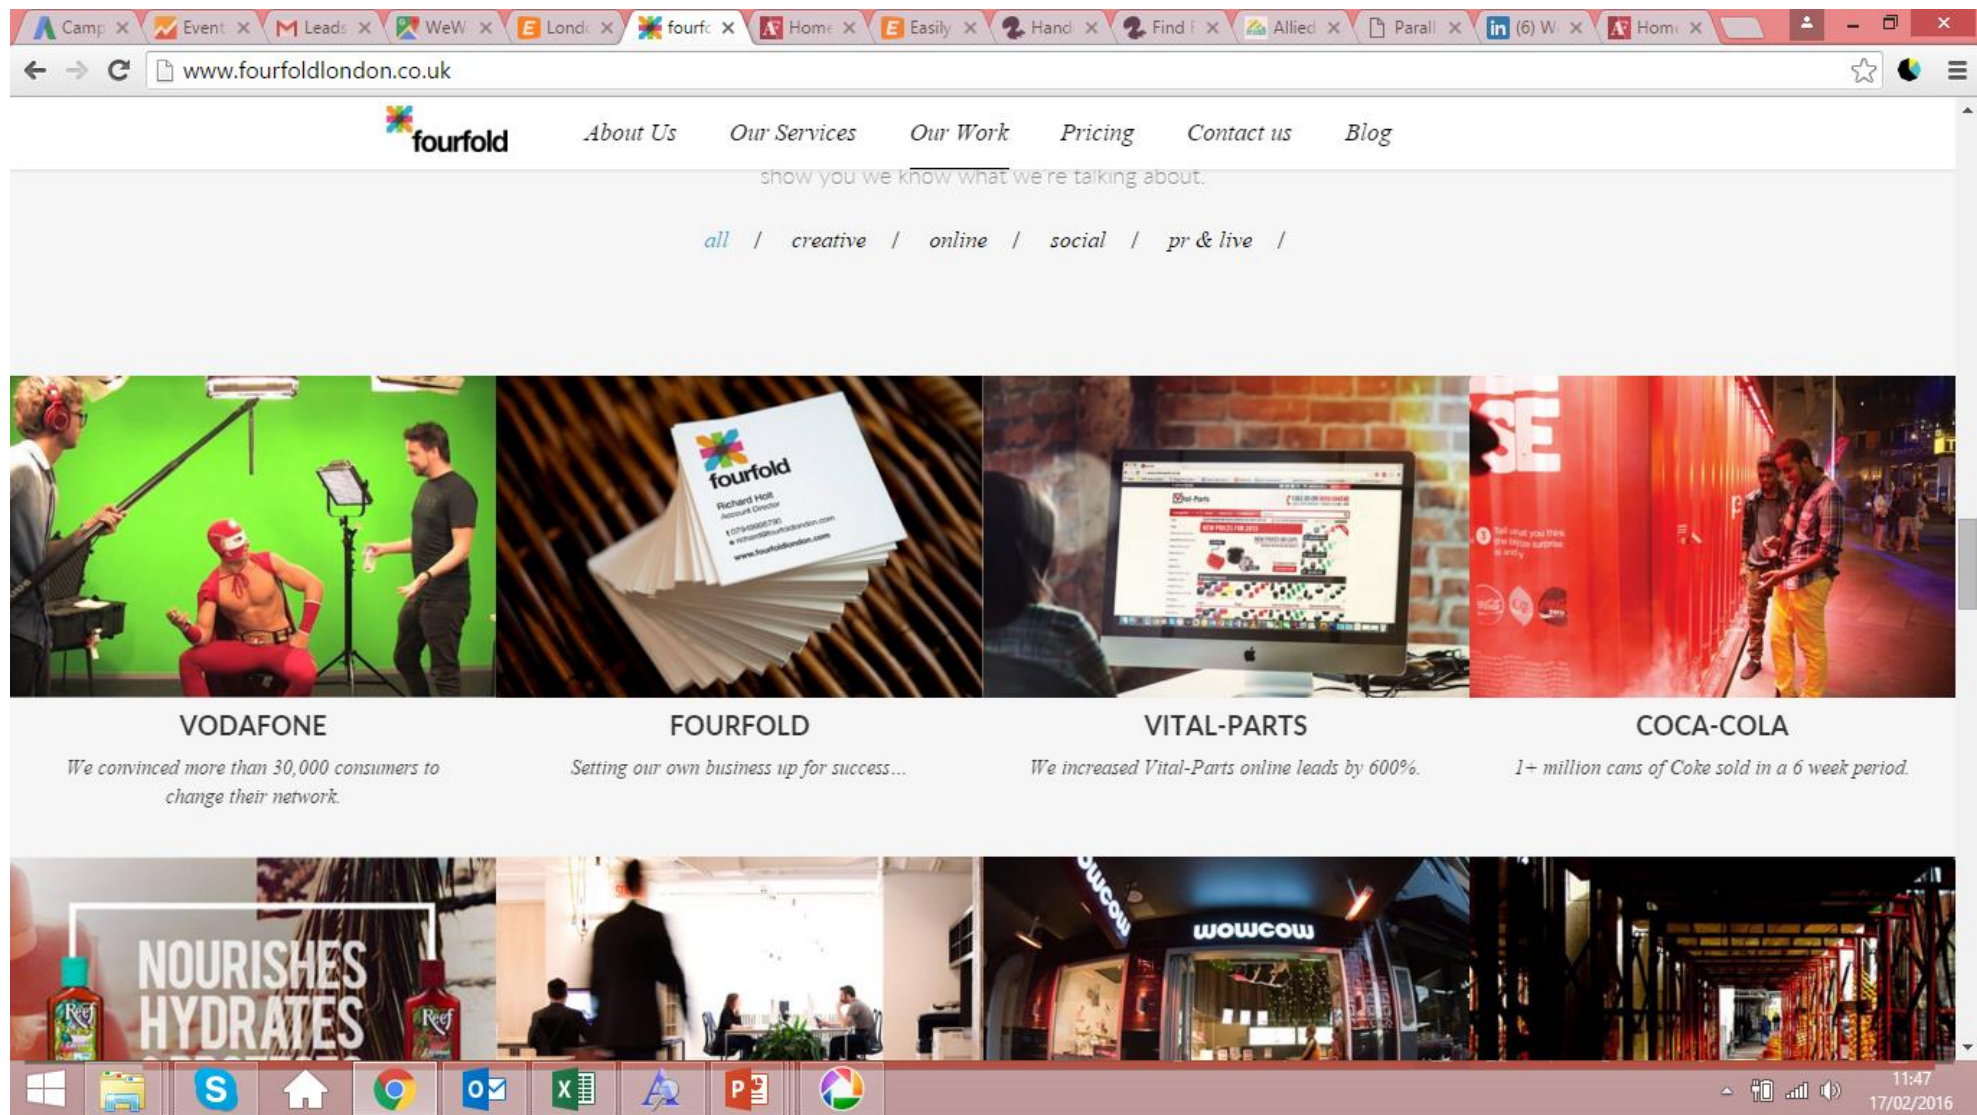

12. I know what we said about using times new roman but it's not really working in this section – do we have Lato Thin in code
Doesn't have to be italic...

13. Only a small thing but can space below that first line be the same as space below first line in 'Our Process'

14. Same with the space below these sub-titles.. Just needs to be reduced slightly (so it's the same as above)

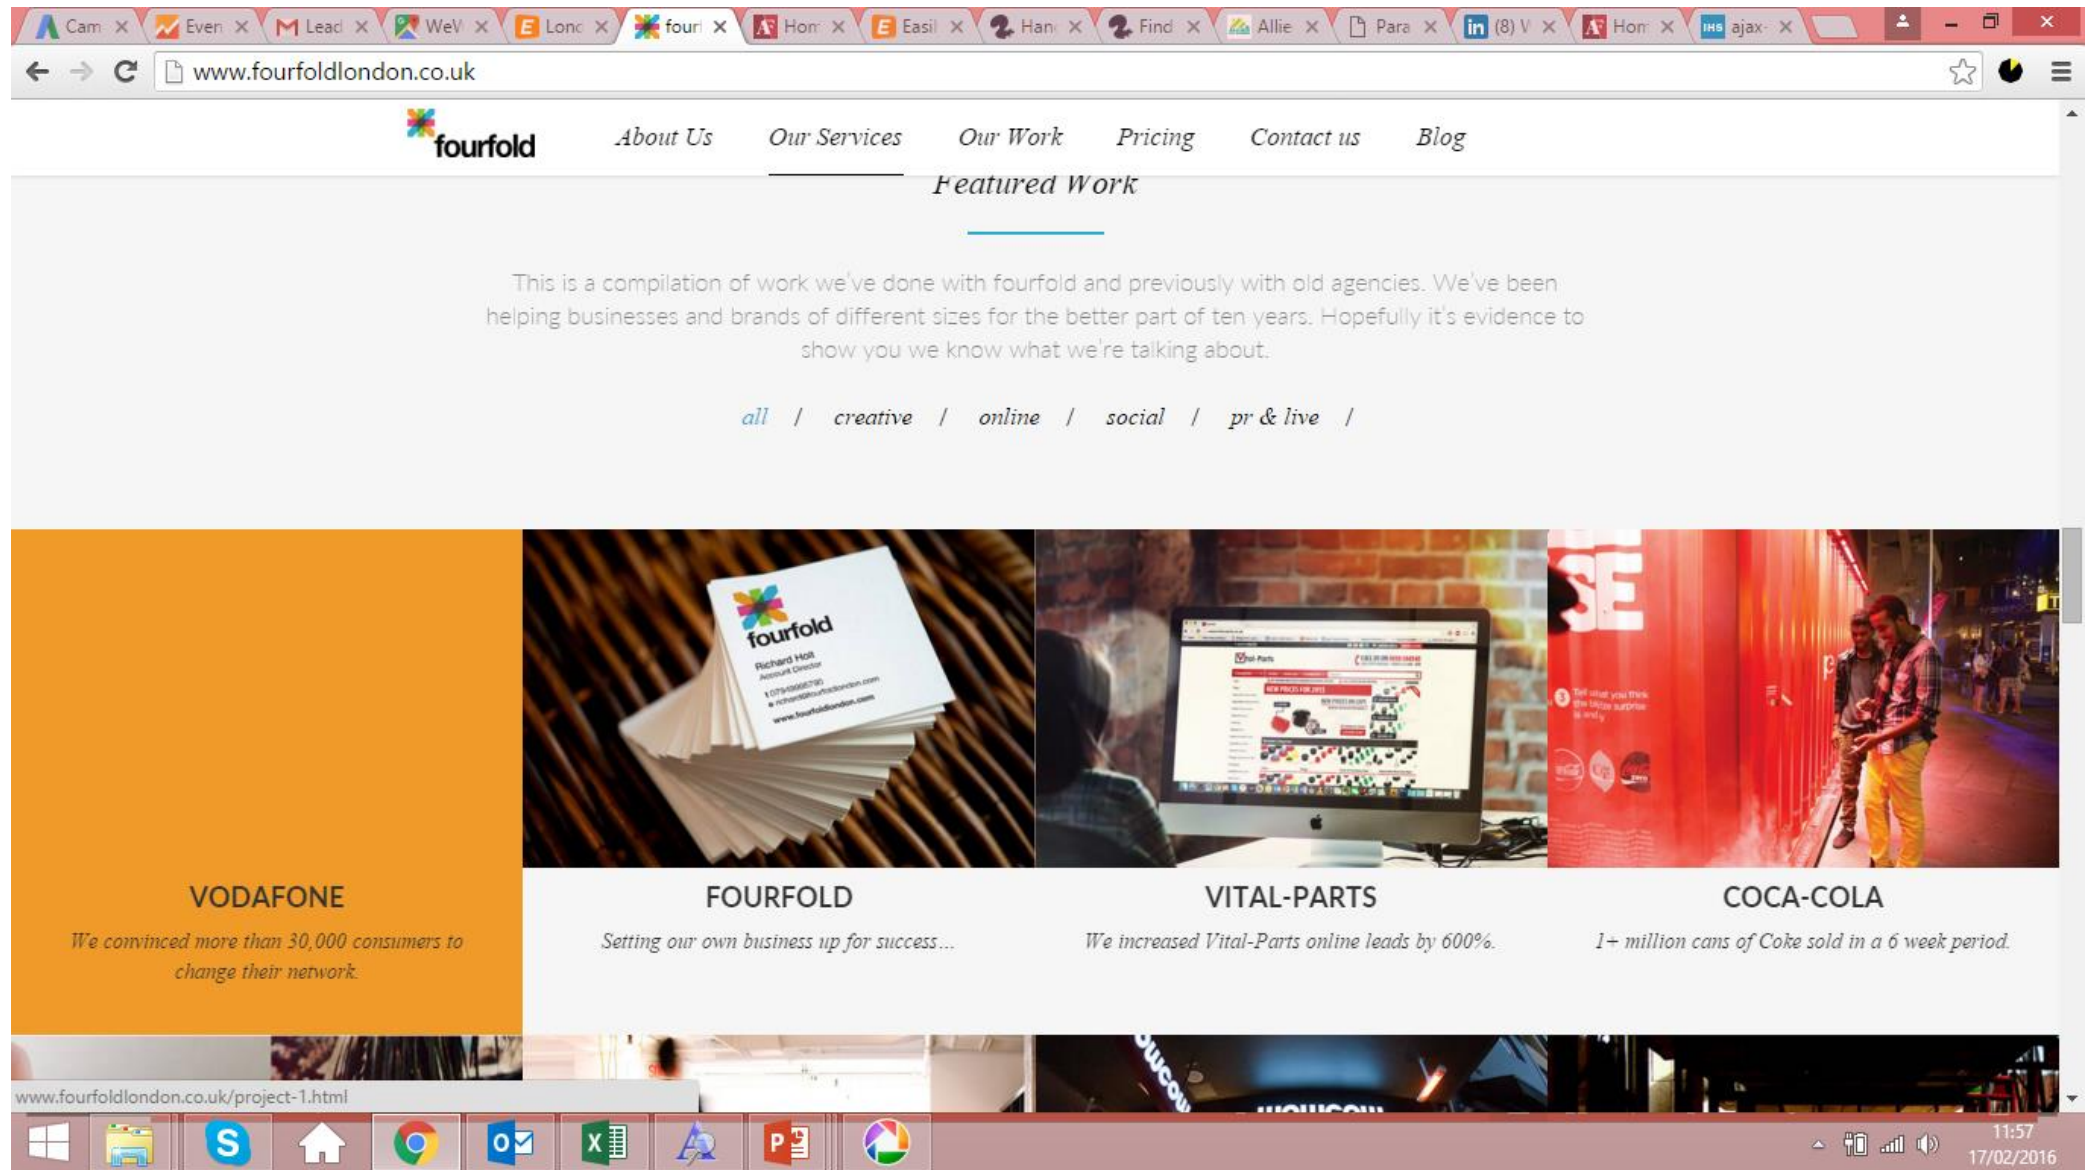

15. I know this is a bit OCD but seeing as you're making it all right for me... there's a very tiny gap between Vital-Parts image and fourfold image. If you're able to sort that, that would be great.

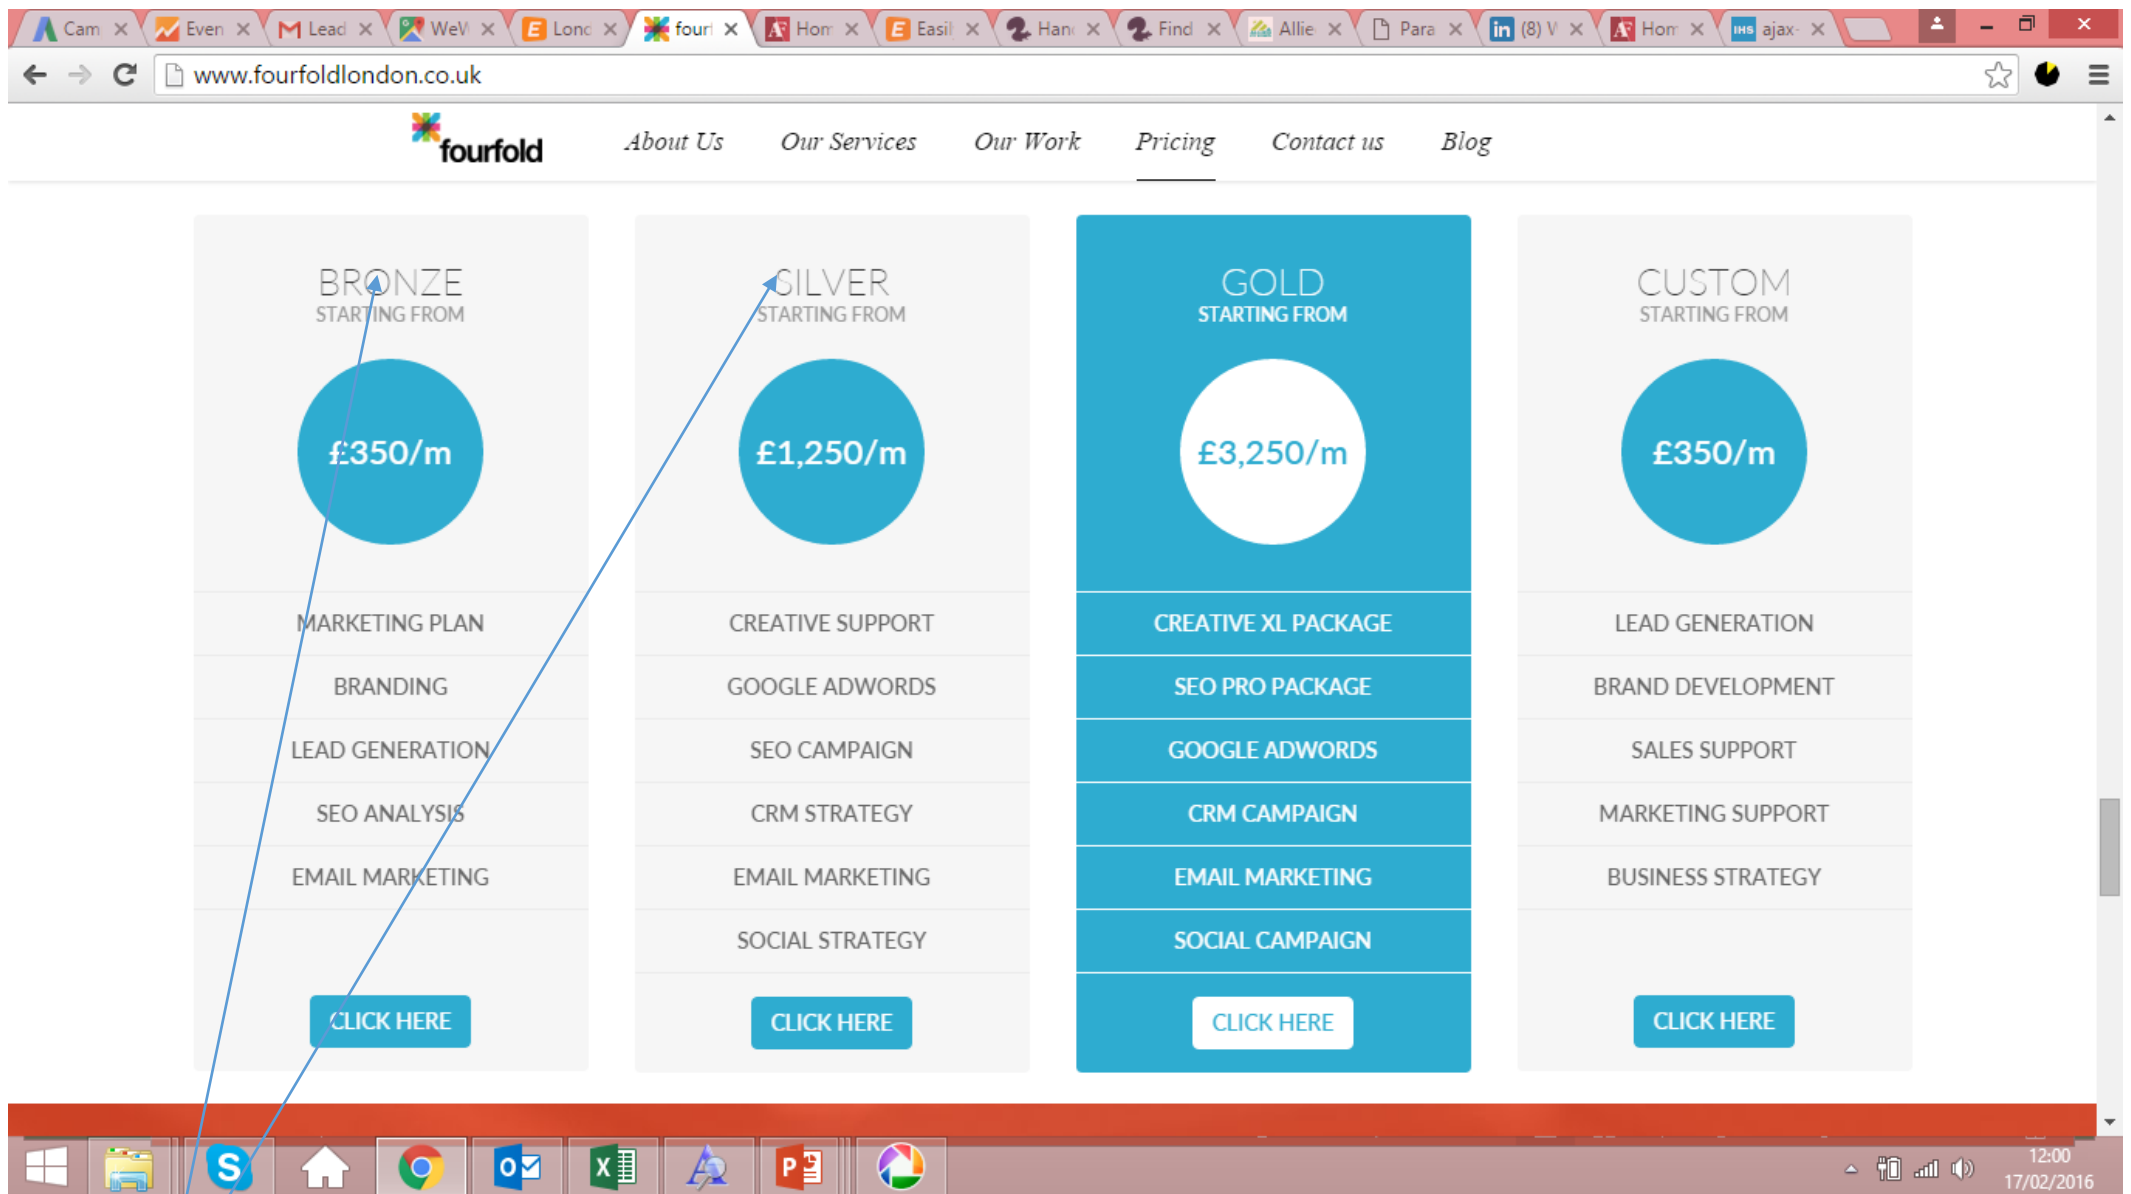

<https://www.ihs.com/images/ajax-loader.gif>

16. With the loading icon at the very start and also on the one in 'Featured Work', can we use this gif instead?

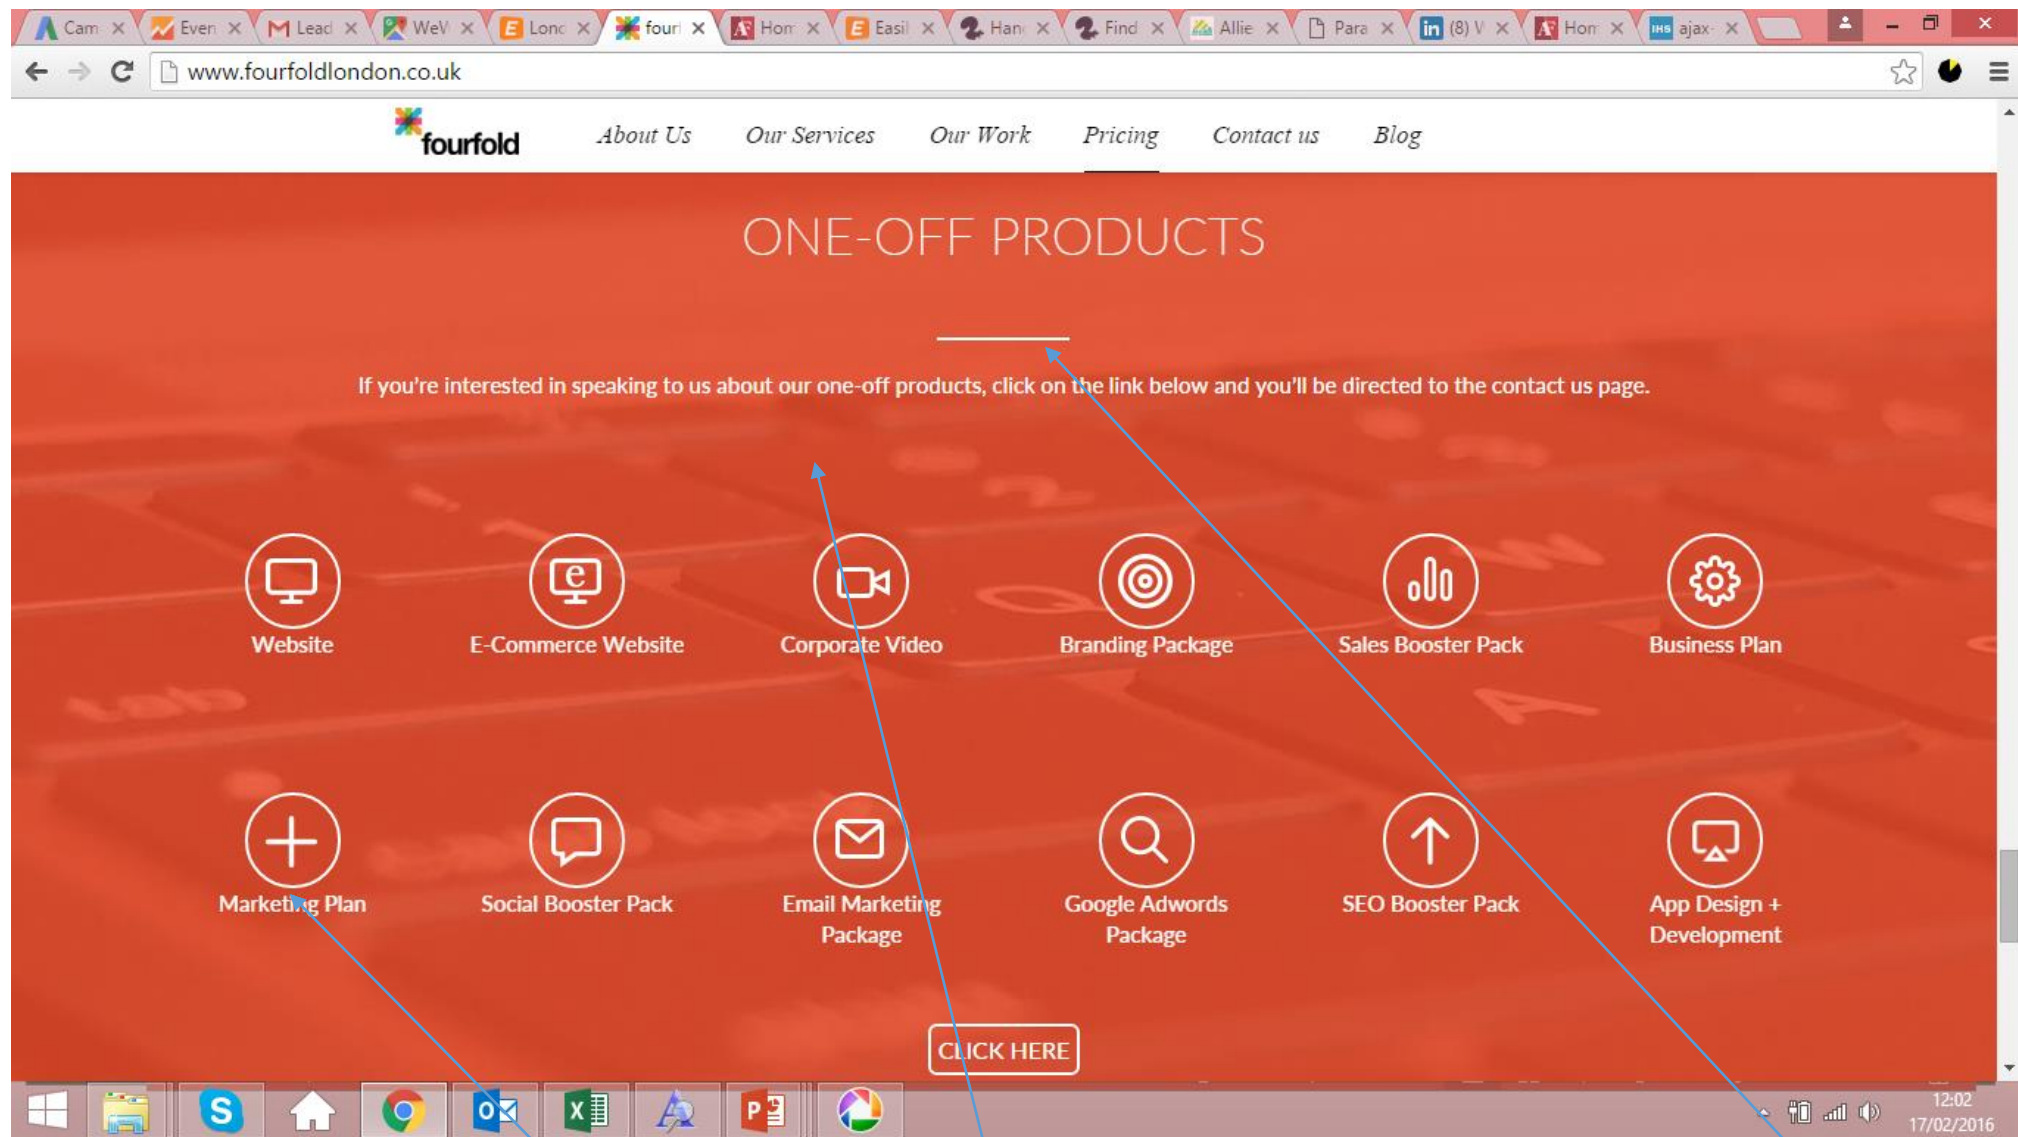

But have it in our blue colour?

17. Instead of grey, could the writing when you scroll over be made white please? Easier to read

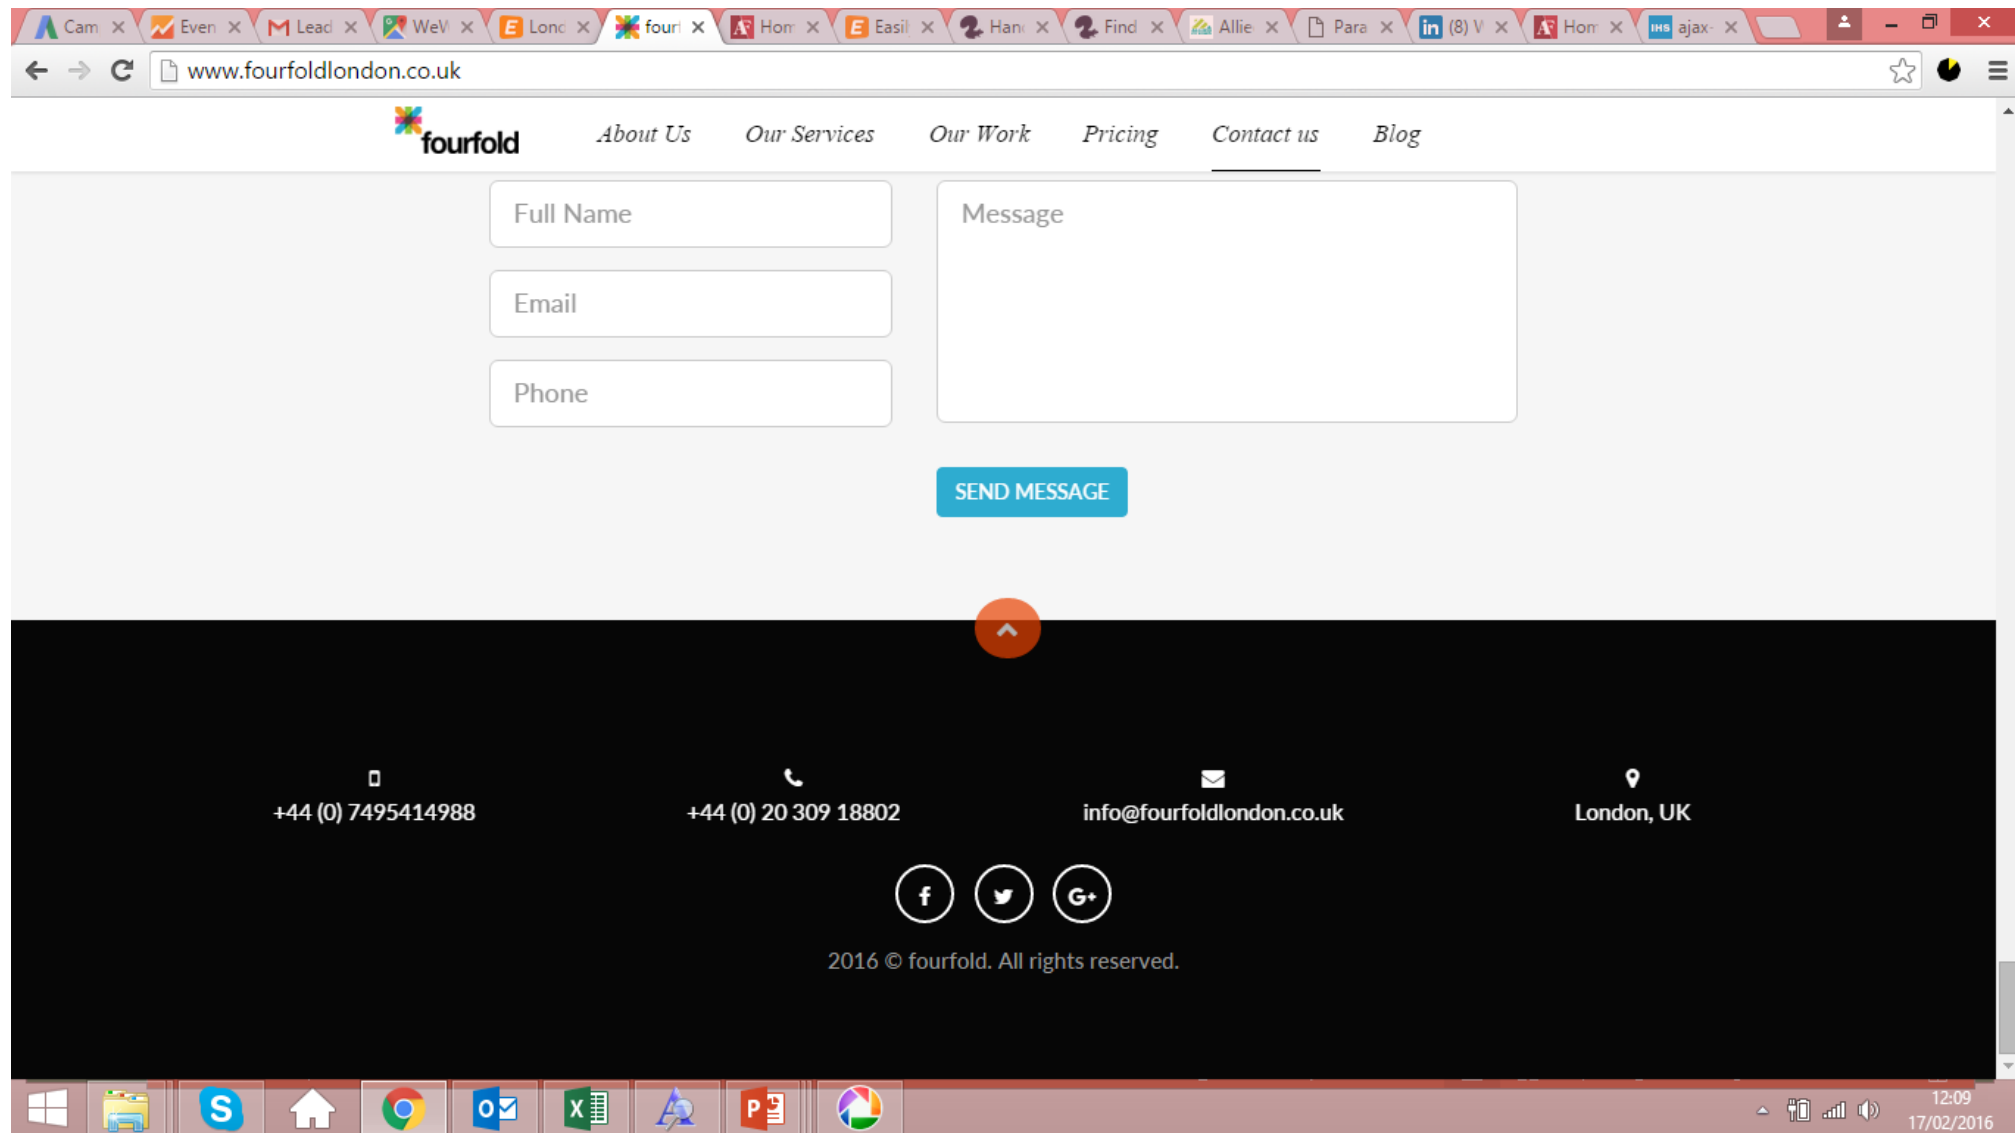

18. I was wondering whether you think we should change the font on 'BRONZE', 'SILVER' etc to the same as one you're using lower in the tables? (bit easier to read)

19. You already know about all the changes here but can you also just make sure spacing between title line and first line of copy is correct (looks too close). And spacing between copy and icons is reduced (at moment looks too much). Finally space between icons and copy underneath looks slightly too small (see Visia theme).

Can you also change 'CLICK HERE' to 'CONTACT US'

20. If you're able to click on the email at bottom and make it automatically bring up your email to send to us, that would be great

- 22. Are we able to get the headers on mobile sorted eg WE HELP BUSINESSES GROW being in middle
- 23. Can you look at Featured Work on mobile and make sure it's working after one click for me please – sometimes it didn't work for me
- 24. "Do you like our WORK so far" etc on mobile... it's pushed up right to the edges. Are we able to have margins on the left and right like the other sections
- 25. Message box on mobile isn't lined up with other boxes I think

26. Last thing...

I may need to swap out the Vodafone example in Featured Work for my Samsung case study and put the Vodafone example lower down in the section..

Will let you know about that.
